The felt on the block of flats, especially above Flat 36, is in very poor condition. Please see photos attached.

I would recommend a new flat roof system which will be an EPDM single ply rubber roof with a guarantee of 20 years.

This will go up and over the coping stones and finished with a metal trim anchoring it down on all edges.

All of the roof lights and vents will be properly sealed round with new pipes added if necessary.

This quote includes new boarding which will be fixed to the existing roof via 25mm x 50mm battens.

Please note that this quote does not include the scaffolding as I am currently waiting for the price for this.
